

Adhesive Applications™

The adhesive solutions company.

PolySil™ Silicone Adhesives

HIGH PERFORMANCE

PolySil™ is a comprehensive line of high-performance silicone film tapes and transfer adhesives, available in an unrivaled variety of configurations. This includes a broad range of thicknesses and colors, as full widths up to 54" and slits down to 1/2". Adhesives are offered with an array of backings and can be single or double coated, with custom toll coating available. Custom configurations are available and require low minimums.

Products are proudly made in the USA in our ISO 9001 registered facility. We provide fast turnaround and maintain the highest quality standards.

PolySil™ Silicone Adhesives

APPLICATIONS

Characteristics of the PolySil™ line make them ideal as a splicing, masking and temporary holding solution for demanding applications.

High Temperature Masking

Splicing

Functional Splicing

Photo Splicing

Plating

Powder Coating

High Temperature Assembly Aid

Brake Assembly

High Temperature Gasketing

Wire and Harness Wrap

Flexible Heating Elements

Composite Bonding

Tabbing

Identification Products

Sublimation Tapes

BENEFITS

Clean removal.

Broad temperature range.

Custom adhesive formulation and color matching.

Customized solutions for unique applications.

Quick turnaround times.

Able to be die-cut.

PRODUCT CONFIGURATION

SINGLE COATED: PET, Polyimide

UNSUPPORTED: Transfer 1 to 5 mils

DOUBLE COATED: PET, PP, Polyimide, HDPE

FILM LINERS: PET, Paper/Film Hybrid
